**Ptr. Rexie-Eric S. Cabulao**

Academic Dean, Evangelical Mission College  
Country Phase II, Bangkal, Mahogany  
Davao City

Dear Ptr. Rexie,

I am writing to express my strong interest in joining Evangelical Mission College as an IT professional, having recently graduated with a Bachelor of Science in Information Technology (BSIT) from Davao del Norte State College. My academic training and practical experiences have provided me with a comprehensive foundation in software engineering, database administration, and workflow systems. Furthermore, my hands-on operational experience at a university Dean's Office involved managing technical deployments, data migrations, and essential user support. Because of this versatile background, I am highly adaptable and confident in my ability to quickly master and work with any system or software environment your institution needs to develop or maintain.

Driven by a dedicated work ethic and a commitment to aligning my technical skills with the values and educational mission of Evangelical Mission College, I am eager to contribute productively to your campus. Thank you for your time and consideration of my application; I have attached my resume for your detailed review. I welcome the opportunity to discuss how my flexible, proactive problem-solving abilities can support your department, and I am available for an interview at your earliest convenience.

Sincerely,

Guerba, Dinno
